Professional Summary

Computer Science and Design graduate with practical experience in Full-stack web development and Mobile app development. Proficient in Python, React, Flutter and modern web technologies. Developed multiple academic and freelance projects including AI integration, cloud-based backend services, and payment gateway integration. Strong problem-solving abilities with a keen interest in developing efficient and impactful digital solutions.

Skills

Programming Languages: Python, C

Frontend Development: HTML5, CSS3, JavaScript, Bootstrap, React.js, Three.js

Backend Development: Django, Flask

Databases: MySQL, Firebase, Supabase

Dev Tools & Platforms: Git, GitHub, Vercel, VS Code, Antigravity, ChatGPT

Soft Skills: Event Coordination, Leadership, Mentoring, Team Management

Projects

SignifyEd:

A web-based accessibility platform that converts **Text, Audio, and Video content into Indian Sign Language (ISL)** to improve access to digital educational content for deaf and hard-of-hearing learners. Implemented an end-to-end pipeline using **Python Flask, NLTK, speech recognition, FFmpeg, and React.js**, including **speech-to-text conversion, NLP preprocessing, ISL gloss generation, and gesture/keypoint mapping**. Structured an ISL dataset using **MediaPipe hand and pose keypoints** and developed sentence-level keypoint sequences for potential **3D avatar-based sign visualization using Three.js and GLB models**.

- **Tech:** React, Python Flask, OpenCV, Three.js, AI Systems
- **Links:** [GitHub Repository](#)

LabelBee:

A SaaS platform for creating personalized, print-ready name slips and documents. Users can add photos and details, customize backgrounds using **AI-generated designs**, and export A4-ready sheets as **PDF or PNG**. The platform also includes **credit-based downloads and Razorpay payment integration**.

- **Tech:** React, Firebase, Vercel, Razorpay
- **Links:** [Live Demo](#)

Workify:

A Flutter-based mobile application that connects **clients with local workers**, enabling clients to post job requests and workers to discover and accept relevant work opportunities. Implemented **Firebase Authentication, Cloud Firestore, and real-time data synchronization** for secure user management, job tracking, and status updates. Designed a mobile-first workflow for **job posting, worker acceptance, and request management**, focusing on simplifying access to local employment opportunities.

- **Tech:** Flutter, Firebase Authentication, Firestore & real time database
- **Links:** [GitHub Repository](#)

Internships

Python Full Stack Intern | SMEC Technologies, Kochi, Kerala | (present)

- Developed and practiced full-stack web application development using **Python, React.js, and SQL**, gaining hands-on experience in building structured and data-driven applications.
- Worked with **SQL and relational databases** to create tables, write queries, perform CRUD operations, and manage relationships between application data.
- Used **Git, GitHub, VS Code, and Postman** for version control, development, API testing, debugging, and collaborative software development workflows.

Education

B.Tech in Computer Science and Design (CSD)

Government Engineering College Kozhikode (2022–2026)

CGPA: 7.34

Achievements

- Winner – Flutter + AI Hackathon (2025)
- Finalist – IEEE Young Professional Hackathon (2025)
- 1st Runner Up – SMEC Technologies Hacking Challenge (2026)
- Completed IBM Flutter Development Course with a 97.33% grade (2026)

Leadership & Community Roles

- TinkerHub GECK Co-Lead (2024)
- VIBE GECK – Mentor (2024-2026)
- Active contributor to multiple student and tech community initiatives

Languages

English: Professional Working Proficiency

Malayalam: Native Proficiency
